PROFESSIONAL SUMMARY

AWS & DevOps Engineer with hands-on internship experience in AWS cloud infrastructure, Linux administration, Docker, Kubernetes, Jenkins, GitHub Actions, Ansible, and CI/CD automation. Experienced in deploying containerized applications, configuring AWS networking and security, and automating application build and deployment workflows. Built practical projects involving AWS 3-tier architecture and a Docker Swarm cluster with Jenkins-driven Docker Hub image automation.

TECHNICAL SKILLS

Cloud	AWS – EC2, S3, RDS, VPC, IAM, EBS, EFS, FSx, Lambda, ALB/Load Balancer, Auto Scaling, CloudWatch, Route 53, CloudFront
DevOps & CI/CD	Git, GitHub, GitHub Actions, Jenkins, Maven, SonarQube, Nexus Repository
Containers & Orchestration	Docker, Docker Compose, Docker Hub, Docker Swarm, Kubernetes
Automation & Config	Ansible, Terraform, AWS CloudFormation
Monitoring	Prometheus, CloudWatch
Operating System	Linux
Networking	VPC, Public/Private Subnets, Route Tables, Security Groups, NAT Gateway, Internet Gateway, Load Balancing, DNS
AI Tools	Generative AI, Prompt Engineering, AI-assisted Coding & Automation
Programming & Database	Java, Python, Bash/Shell Scripting, JavaScript, SQL, MySQL, REST APIs

WORK EXPERIENCE

AWS & DevOps Intern — Technical Hub	<i>Jun 2024 – Jun 2025</i>
• Gained hands-on experience in AWS Cloud and DevOps through practical projects and real-world lab environments. • Worked with AWS services including EC2, S3, RDS, IAM, VPC, EBS, Load Balancer, Auto Scaling, CloudWatch, and Route 53. • Built and managed CI/CD pipelines using Jenkins and GitHub Actions for automated application build and deployment workflows. • Worked with Docker and Kubernetes for containerization and application deployment. • Used Ansible for configuration management and automation across Linux environments. • Managed source code using Git and GitHub and worked with Maven, SonarQube, and Nexus in CI/CD workflows. • Performed server administration, application deployment, and troubleshooting using Linux.	

PROJECTS

PROJECT 01

Docker Swarm Cluster & Jenkins CI/CD Automation — AWS EC2

- Configured a Docker Swarm cluster across 3 AWS EC2 instances with 1 Manager node and 2 Worker nodes.
- Integrated Jenkins with the application workflow to automate Docker image build and push to Docker Hub.
- Used GitHub as the source-code repository and connected the CI/CD workflow with containerized application deployment.
- Deployed and managed application services across the Swarm cluster using Docker service and replica management.

PROJECT 02

AWS 3-Tier Web Application Architecture

- Designed a highly available 3-tier architecture on AWS using VPC, public/private subnets, ALB, EC2, NAT Gateway, Internet Gateway, and RDS MySQL.
- Configured route tables, security groups, and IAM to implement secure communication between web, application, and database tiers.
- Implemented IAM, security groups, and least-privilege access controls to secure AWS resources.
- Deployed application servers in private subnets and used CloudWatch for infrastructure monitoring.

PROJECT 03

DevOps CI/CD Pipeline for Spring Boot Application

- Developed a Spring Boot application using Java and MySQL and containerized it using Docker.
- Built a CI/CD pipeline using Jenkins, GitHub Actions, Maven, SonarQube, and Nexus for automated build, testing, code analysis, and artifact management.
- Deployed the Dockerized application on AWS EC2 with Amazon RDS MySQL and configured AWS networking and security.
- Used Ansible and Linux for server configuration and deployment automation.

EDUCATION

Bachelor of Engineering & Technology — Aditya College Of Engineering & Technology

Nov 2022 – May 2026 | Final CGPA: 8.5

CERTIFICATIONS

- AWS Cloud Practitioner
- Java-IT Specialist
- CCNA (Cisco Certified Network Associate)
